

# R. A. WALDRON

## BABA NU HERI MENSA OGUN

# GOD GENES DECODED

Groundbreaking author, R. A. Waldron, a.k.a. Baba Nu Heri Mensa Ogun is a Vodou Priest of the Nile Valley Traditions who is bringing Khemit (Egypt) back to Vodou and bringing Vodou back to Khemit. He is a Houngan Asogwe, Babaloo, Shaman, Yogi, Occultist, Kabalist and universal spiritual traveler whose ancestors trace their roots back to the Congo; the source of humanity's evolutionary development from ape to Gods. R.A. Waldron is labeled an eclectic from spiritualists, scholars and celebrities who rave about *The God Genes Decoded*; however he is a humble priest seeking improvement and unity amongst all the races, cultures and religious groups for the benefit of us all. He says, "We have allowed too much ignorance and too many toxic ideas to divide us as a blessed species on this planet. It's time for healing and moving forward. This means that all of us have the task of working through our personal errors and accumulated trauma. We have all been afflicted in some way. None are perfect nor shall ever be, but to heal is to evolve and to evolve is to heal."

For the first time, the sacred wisdom of the ancient Egyptians is being expounded upon by a high priest of the Vodou religion who has taken it upon himself to channel numerous deities to bring as much clarity as possible to the phenomenal pyramid texts. In a turbulent world that often separates us from our neighbor, based on religious, social, economic and racial differences, R.A. Waldron exposes long held myths by decoding the creation stories of one of the world's oldest civilizations. The conditions that plague the world may seem laden with despair, but R.A. Waldron reveals that the universe and nature are all within our personal and collective control. *The God Genes Decoded* not only provides in depth historic, scientific and cosmological evidence, but also offers current and practical spiritual solutions that we can apply to our daily lives. This book will lay the foundation for all students of kaballah, priests of all faiths, and those who are simply interested in achieving a clearer understanding of our universe. You will be amazed by the simplicity with which R.A. Waldron has decoded the buried meanings of the ancient Egyptian texts to illustrate the organic harmony between science and religion, and to reveal the unifying qualities within man and the universe.

R. A. Waldron, a.k.a. Baba Nu Heri Mensa Ogun is part of a family of ancient priests who trace their lineage across many of humanity's earliest civilizations, including the civilizations of the Nile Valley, the Middle East, Mayan and Incans.
